Santander Bank Foundation
Shapiro Foundation
Shattuck Charitable Trust
State Street Foundation
Tomfohrde Foundation

Supporting immigrants in pursuing their educational, economic and civic aspirations through learning English.
ENB makes grants to high-quality English language learning programs for adult immigrants.

ENB provides training and resources, by:
• Training English language instructors and providing them with the tools they need to offer high-quality instruction that is responsive to each student’s background, experience, and goals.
• Offering professional development in classroom technology and assisting with program design, student assessment and evaluation of progress.
• Recruiting and training volunteers to accelerate student learning.

ENB drives innovation, including:
• Creating customized curricula, such as ESOL for Parents and Caregivers, ESOL for Entrepreneurs, and Pre-LEAN ESOL (for workplace efficiency training) to meet specific sector needs.
• Promoting program design that is based on student goals and backgrounds.
• Leveraging digital tools to ensure students gain 21st century skills.
• Collecting, analyzing and sharing data to push continuous improvement in the field.

ENB raises public awareness:
Through our English Works Campaign, we raise awareness among civic and business leaders of the importance of English proficiency for immigrants and their families, workplaces, and our communities.

ENB unites stakeholders to advocate for greater investment in English language learning programs, and promotes partnerships between employers and ESOL providers that make it possible for employees to learn English at work.
